FEB 11 1992

Dear Prof. Meselson,

Thanks for your fax from Jan. 22, 92.  
I understand your willing to visit Ekaterinburg,  
but doubt, that after all these years you  
can find scientific evidens, what happened.  
In Soviet press during this Autumn were  
published several big article about abrax  
case of 1979, where directly establish, that  
it was some accident in "Sverdlovsk-19 (or 17)"  
Laboratory. Couple week ago in the 1st  
channel Russian TV have been shown  
a film about this case (I think,  
it may be possible to translate it into  
English, ~~and~~ - if they find it in archives).  
Of course, it possible to visit Ekaterinburg,  
but for if you need someone, who will

(2)

organize this trip in Sverdlovsk. <sup>it may be</sup> I think ✓  
if someone from mentioned your letter.

For my side, - I try to pass through  
Russian parliament the similar Law, which  
you have in USA (about Antax).

Cordially

Alexey  
Yakovlev
