Cambridge, MA 02138

Dear Dr. Meselson:

I would like to request your help with a television documentary that the Media Center at the School of Social Work is producing. The program is a 28-minute documentary about how U.S. military forces protect themselves against chemical weapons. We hope to have the piece broadcast on PBS, The Discovery Channel, or A&E sometime this year.

We would like permission to videotape an interview with you on March 20, 1991 at the Brookings Institution. On this date, we plan to also interview Ms. Elisa Harris of the Institute.

Although we are working with Mr. Mickey Morales of the Army Chemical Research, Development, and Engineering Center at Aberdeen Proving Ground, this is a University of Maryland School of Social Work project.

Thank you for your participation in this endeavor.

Sincerely,

Michael William Garcia
Director, Media Center
