Dear Professor Meselson:

I recently arrived home from California and noted your name and address magnetized to the refrigerator door. Will had spoken of you often, and I know he planned to be in touch with you on return from our brief planned business trip to California and I know he planned to call you over the summer. Unfortunately he became ill the day after our arrival in California, and after a stormy course he died in Alta Bates Hospital, Berkeley, California, August 28, 1991. Your communication to him just arrived, having crossed the country at least once. I wanted you to know why you had not heard from him and could not contact him.

I have notified Alex Langmuir, though I'm not sure I had the correct address.

I hope the Russian mystery will be solved. Will hoped so much that he could participate in the adventure.

Sincerely yours,

A handwritten signature in cursive script, appearing to read 'Margaret'.

Margaret J. Albrink, M.D.
Professor of Medicine Emeritus
Section of Endocrinology
