TEXT

Dear Math,

I think you mentioned to me earlier this year about the Harvard Colloquium on Chemical and Biological Armament and Arms Limitation, to be arranged by you. In any case, I saw a reference to it in the latest ASA Newsletter, 91-4. We also heard the other day on a Swedish news broadcast that there was presently a conference at Harvard on environmental effects of the Iraq-Kuwait war. I am not sure whether this referred in some way to your Colloquium. However, in case it was not so, I suppose that you have heard about it.

May I trouble you to inform me about where I might turn for information about the environmental conference, in case it does not refer to your Colloquium, and when any publications about the two events may be available?

I would also be very grateful if it were possible to obtain copies of the presentations during your Colloquium by:

Bob Mikulak on the CWC and the BWC,
Dr Galluchi on the considerations for the destruction of chemical weapons in Iraq,
Professor van Courtland Moon on BW allegations during the Korean War, and
Ms Holgate on the environmental politics regarding destruction of chemical weapons..

I assume that you yourself made a presentation which I would very much appreciate receiving.

I thank you in advance for any help you can give me and send you my best regards.

Yours,

Johan Lundin
