Ambassador Rolf Ekeus  
United Nations  
The Special Commission  
Room 3120G  
Secretariat Building  
New York, NY 10017

Dear Rolf and Johan:

It was a great pleasure to see you both yesterday afternoon, so soon after events of great meaning for all of us. Here for your possible interest is some literature from Geophysical Survey Systems Inc. One of their technical people told me on the telephone that they might be able to provide a unit capable of seeing down to approximately 100 feet beneath the surface in sand. Their telephone is 1-(800) 524-3011.

If there is an opportunity for me to help the Special Commission in any way, I would be most glad to do so.

Best wishes,

Matthew Meselson
