Dear Dr. Haynes:

This is a terribly late answer to your kind letter of November 22, 1990. A person who has been thinking about microbial ecology and biological warfare is Mark Wheelis:

I wonder if you know of the book by John Bryden entitled Deadly Allies: Canada's Secret War 1937-1947 published by McClelland and Stewart Inc. It is an interesting history.

For your possible interest, I enclose two articles I have recently written about the Biological Weapons Convention.

Sincerely yours,

Matthew Meselson
Professor of Biochemistry
and Molecular Biology
