Subject

Your letter

Dear Matthew,

I came across the following abstract of a study report from the Army War College. It now seems that even in the Army you can freely talk about completely repudiate (I had to look this up in a dictionary) CW whilst maintaining protection. I will be visiting NATICK once more on 22 and 23 October. My point of contact there is Matthew L. Herz (phone (508) 651 4245) I expect to have a very busy programme, but may be something can be arranged to talk for an hour or two.

Kind regards,

  
Dr. J. Medema
