Australia 3122.

15 November 1991.

Dear Matthew,

Thank you for your letter of September 24, and the report of the meeting on antichemical protection, which was held in Spain. Let us hope that the findings of the meeting will help to facilitate the negotiations in Geneva. Should the draft treaty really be completed next year we shall all be delighted, and also astounded! We have spent so much time and effort on its drafting that I at least have come to think it will never be completed.

The Peace Research Centre at ANU has published the proceedings of a meeting "Chemical Weapons and Missile Proliferation" which Julian, Charles Flowerree and I attended. I have two copies and wonder would you like one. Julian may of course have sent you one, as we all received two. I shall mail it if you say yes.

I had a great holiday in the Indian Himalaya in August. Both the landscape and the journey were rugged, but it was very worthwhile.

I hope that you will visit us here in Australia some time, and look forward to seeing you if/when you do.

Sincerely,

Shirley
