Professor Marvin M. Miller
Building 24-109
Department of Nuclear Engineering
MIT
Cambridge, MA 02139

Dear Dr. Miller:

I am writing to urge you to continue the very promising discussions with Israeli parliamentarians and others that you initiated at the American Academy of Arts and Sciences on February 6-7. In my own area of chemical and biological weapons arms control I felt that this was the first time, after many attempts, that I had reached a group of Israelis both interested and influential enough to move these issues forward.

Sincerely yours,

Matthew Meselson
