Dear Matt,

Not only am I grateful for your reading my little piece, but for the extraordinary speed with which it has come back. Most of the changes have been made. "Seminal" was I think too clever a play on words.

I am particularly concerned about the highest level we ever found in milk. I may be deluded, but I think I have been going around thinking that the 1400 was in milk. We will carefully check this out.

I will call you very soon for a meal.

Yours,

John D. Constable, M.D.
