Dear Dr. Khripunov:

As we discussed yesterday in Washington, I am assembling information regarding chemical demilitarization methods for GB, mustard and VX used in countries other than the United States. I am a member of the National Academy of Sciences Committee on Alternative Chemical Demilitarization Technologies and the information will be used in the preparation of our report.

I would appreciate any help you can give me regarding Soviet and Russian technologies. In particular are there any errors on the two following sheets entitled Soviet Union-1 and Soviet Union-2? I would be especially grateful if you could help me to correct or fill in the information at the places indicated with question marks.

Sincerely yours,

Matthew Meselson
