Dear sir

I have some suggestions for collaboration in writing the monography "Chemical weapon at the turn of the centure".

I know your publications in the area of the chemical weapon ("The inyth of chemical Superweapons" and others). My speciality is a military chemistry. I have a many-year experience in the area of chemical weapon and chemical defense. I was the chief of the military-chemical facility Shichany near Saratov (Russia).

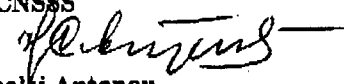

My suggestion is:

- the meeting in Moscow to have a discussion of the contents of the monography;
- writing the monography by me and translation it english;
- your addition to the text of monography;
- your editorship of a manuscript.

I may write own part of a monography for 9 - 12 months.

I'll be very grateful for your answer.

Sincerely yours,  
director CNSSS

prof.   
Nikolai Antonov
