Prof Matthew Meselson  
Harvard University  
Cambridge, Mass. 02138

Dear Prof Meselson,

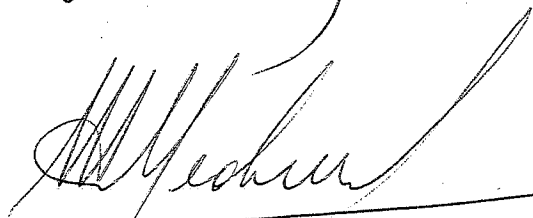

Greetings from London. After retirement from my lab work in 1991 (when I was 65) I started much wider explorations of different Russian problems. This year I received an invitation from The Savannah River Ecology Lab. of the University of Georgia to visit them and to give seminar on Chernobyl/Kyshtym accidents and to stay with them for a week. They do some collaborative work in Chernobyl on genetic changes of plant and animals. They offered me a generous fee which makes possible to travel with my wife who also

is a biochemist

I hope to visit Harvard University  
Russian Institute and also Loren Graham  
centre on Russian science. Probably I also  
be able to visit your lab. and to discuss some  
current problems ?

With all best wishes

Yours sincerely

---

Zhores A. Medvedev
