Dear Dr. Meselson:

I am doing research for a book on Agent Orange to be written by Peter Sills. We are lacking the 9th & 10th Quarterly Reports of the Bionetics Study and wonder if you could help us locate copies of the teratogenesis chapters of those reports. We have copied the other Bionetics reports from the documents amassed for the Agent Orange class action lawsuit in 1984, but have only the title pages from the 9th & 10th reports.

Also, would you be willing to be interviewed about Agent Orange and especially about Bionetics and your part in bringing it to public knowledge?

Thank you,

*ANNE MILLER*
