Dr. Matthew Meselson
c/o Harvard University
Cambridge, Massachusetts

Dear Dr. Meselson:

2-2592

I was interested to learn of your consultant status with ACDA in the field of CB warfare. If we are successful in our bid on ACDA Proposal Request 64-13, I am sure that occasions will arise when it will be helpful to be able to talk over problems with you. In any event, I hope that we will find an opportunity in the not too distant future to discuss our mutual arms control interests.

You expressed an interest in the names of papers relating to CB warfare that were presented at Ann Arbor in January of this year. To the best of my knowledge, there were two such items:

1. "The Morality of CB Operations: Its Arms Control Implications," by Richard J. Krickus of Melpar, Inc. and
2. "Chemical and Biological Arms Control," by Rodney W. Nichols and Richard J. Krickus of Melpar, Inc.

Find address
of Melpar
Inc.
3000 Arlington
Blvd
Falls Church
Va.

I have a copy of the first of these, should you have any trouble in obtaining it. So far, I have not received a copy of the second one. Actually, there may have been some security problems with the latter, at least that point was raised from the floor following the presentation. Inasmuch as there is considerable doubt as to whether the proceedings of this symposium will be published, you would probably be better advised to approach the authors themselves for copies of their papers.

Sincerely yours,

Russell J. Bowen
