photo copy of my first letter

Institute for Strategic Studies
London
England

Dear Sirs:

I have been informed by Dr. Mathew Meselson (Department of Biology, Harvard University) that you have compiled a bibliography of items appearing in the continental press and professional journals concerning chemical and biological warfare.

Enclosed is a copy of a bibliography of items in the United States public press which I recently compiled. ^(my first small one) Dr. Meselson and Dr. Victor Sidel (Harvard Medical School) who are both active in public studies of these problems have independently compiled largely non duplicating bibliographies. I am in the process of putting all these together. If available, I would greatly appreciate a copy of your bibliography.

If in addition these were printed in quantity, could you possibly send me 24 copies, for distribution to 24 local branches of the Scientists Institute for Public Information. I am enclosing a list of these groups, or if you would like you could send 24 copies to Barbara A. Bates, Administrative Assistant at the national office of the Scientists Institute for Public Information, 30 East 68 Street, Suite 2A, New York, New York 10021.

With my sincere thanks for your help.

Sincerely yours,

Milton Leitenberg
