Well, that accidental realization that Talashmanov was a 'subbotnik' lead to some sleuthing and checking with ex-Soviet friends. The result - the Leninst Subbota was celebrated on 22 April - when he (and others in the alpha group?) by definition were involved in a massive annual "volunteer" clean-up of community property. His incubation period would be only around 14 days!

Call me - we need to discuss this further. ...In the meantime, very best, Alexis
