Dear Math !

This is to let you know how much I regreted it that I never had a chance to say good-bye to you in more or less civilized way, and to thank you for your help during the Conference.

Pugwash was really quite interesting and it even gave me some hope for the future.

You asked me for some material concerning use of CW in Yemen, did I ever give it to you ? If not, should I send it ?

I am looking for some good excuse to invite you to visit us here, and I do hope something will come up.

I hope you have by now recovered from your European illnesses.

Thanks again,

With the very best personal regards,

Alex Keynan
