Dr. Matthew Meselson
The Biological Laboratories
Harvard University
16 Divinity Avenue
Cambridge, Massachusetts 02138

Dear Dr. Meselson,

Your letter of July 18, 1969, to Colonel Osick has been referred to me for appropriate action.

I am pleased to inform you that four Edgewood Arsenal publications have been cleared for public release. They may be obtained for approximately \$3.00 per copy from the Clearing House for Federal Scientific and Technical Information, Springfield, Virginia 22151. Microfiche may be obtained for approximately \$0.65 each, but you would need a reader-printer to reproduce the documents. In requesting the publications, the following should be used:

- a. EASP 600-1, AD 661 319.
- b. EASP 600-3, AD 682 717.
- c. EATR 4071, AD 808 732.
- d. EATR 4075, AD 809 485.

We are attempting to have other documents relating to CS cleared for public release. A supplementary bibliography should be available within the next two months. I should be happy to supply you with the list if you so desire.

Insofar as provision of agent is concerned, I am sorry to inform you that we cannot accommodate your request. Inasmuch as CS, CS₁ and CS₂ are commercially available, I suggest that you contact the following firms for possible satisfaction of your requirement:

SMUEA-POPL-L
Harvard University

16 September 1969

- a. Federal Laboratories, Saltsburg, Pennsylvania.
- b. Fisher Chemical Company, Englewood Cliffs, New Jersey.
- c. Thiokol Chemical Company, Woodbine, New Jersey.
- d. Northrop-Carolina, Asheville, North Carolina.

Please contact me if we can be of further service.

Sincerely yours,

ROBERT J. HART
QRI Program Manager
