12th June 1959

Dear Dr. Meselson,

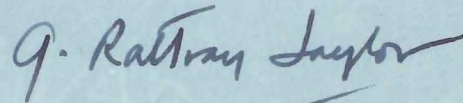

Now that I have got back to England, I should like to write to thank you very warmly for giving me so much of your time to explain your work when I was in America. I was most interested in what you told me, and it provided me with most helpful background.

I am now going over my notes and beginning to prepare scripts for the proposed programmes. I don't yet know whether it will be practicable to include the presentation of your work, but if it is, Aubrey Singer, the producer of the series, will get in touch with you during the next month or so.

If you are in London in the future, and have any time to spare, it would be pleasant to meet again, and I hope you will get in touch with me.

With renewed thanks.

Yours sincerely,

(G. Rattray Taylor)

Dr. Meselson,
