

September 6, 1963

Mr. I. F. Stone  
5618 Nebraska Avenue, N. W.  
Washington, D. C.

Dear Izzy:

If you have not already seen it, you must read the August 21 statement by the Technical Division of the Greater St. Louis Citizens' Committee for Nuclear Information before the Joint Atomic Energy Committee. I obtained a copy of the statement from the Committee itself and would be glad to send it to you if they are no longer available in Washington. I was astounded by the calculated magnitudes for thyroid exposure presented in the statement.

With best wishes,

MM / JAS
