Dear Mr. Meselson:

Mr. Donovan asked that I thank you for your letter, prompted by our June 27 essay on biological and chemical warfare. We were interested to hear from you on this subject, and appreciated having a copy of your testimony before the Senate Committee on Foreign Relations, and of your article from the "New Scientist." The material has been included in our files, where it will be readily available to all our staff.

Also, our thanks for your warm compliments on our Essay. We were glad to hear you thought it well-done.

Sincerely,

Marilyn Miller
