Dear Prof. Meselson

Enclosed are three of "chemistry proposals" by scientists of Ural State Univ. and Ural Science Center, each is connected with $\sim 15 \div 20$ people working on the every subject.

We are trying to get them funded here. and any your advice and help how to do that would be very much appreciated.

As an example (a good one, indeed!) I am sending also the vita of one of PI's of one of the projects (who is here with me at Northwestern and has the lab. in our institute in Ekaterinburg and the group in the Ural State University).

Best regards.

Yours.

V. Gubanov.
