October 11, 1966

Professor Matthew Meselson
Biological Laboratories
Harvard University
16 Divinity Avenue
Cambridge, Massachusetts 02138

Dear Matt:

George Milly and I are looking forward to your visit on Friday, October 14. We have scheduled our meetings for 2:00 PM. I am enclosing some information about the Travelers Research Center interests and programs. This will give you some background on our activities.

I have relayed your questions to George Milly and we have discussed the activities in the area of biological inspection. I believe your visit will be profitable in that we can pursue the topic of inspection systems and requirements in general, in addition to discussing specific questions relating to particulate concentrations, condensation nuclei, and attenuation of particulates by precipitation.

If you have any further questions, please call. I'll see you on Friday.

Sincerely,

Robert H. Ellis
Division Director
Operations Research Division
