

October 18, 1966

Dr. Robert H. Ellis
Division Director
Operations Research Division
The Travelers Research Center, Inc.
250 Constitution Plaza
Hartford, Connecticut

Dear Bob:

I enormously enjoyed my visit with you and George Milly last Friday. I profited very greatly from our discussions of the behavior of particulate matter in the atmosphere. It is clear that I must now learn something about the level of the natural background under various conditions if I am to form an opinion regarding the feasibility of non specific detection methods. I have initiated several inquiries on this matter and will keep advised of any information I receive, just in case it may be new to you.

If it is consistent with the policy of Travelers I would greatly appreciate receiving copies of the following four publications listed in your January, 1966 publication's summary:

7022-83
7000-103
7231-184
7231-202

Sincerely yours,

Matthew Meselson
