FEDERAL REPUBLIC OF GERMANY

Dear Mr. Brandt,

I enclose for your possible interest a copy of the article "Chemical Warfare and Chemical Disarmament" written by Julian Robinson and me and published in the April 1980 issue of Scientific American magazine. In the article we have tried to address some of the policy issues for NATO which I had the pleasure of discussing with you in your suite at the Waldorf Astoria Hotel when you were visiting New York in March 1975. I have welcomed the improvements in NATO's anti-chemical measures which have taken place since that time. Indeed, this progress on the defensive side plus the continuing improvements in the effectiveness of high explosive and other conventional weapons has, if anything, strengthened my view that offensive chemical weapons are not a good investment for NATO, both because of the questionable military effectiveness against the well-defended Warsaw Pact forces and because of their special potential for causing civilian casualties.

If any situation should arise in which I might be of assistance to you in regard to the subject of chemical defense, please do not hesitate to contact me.

Respectfully yours,

Matthew Meselson
Professor of Biochemistry

Dear Prof. Meselson,

Mr. Brandt has asked me to thank you very much for your kind letter as well as for sending him a copy of the most interesting article "Chemical Warfare and Chemical Disarmament", which you have written together with Julian Perry Robinson. The Chairman remembered very well the discussion you have had with him in New York in March 75 and he read with great attention your analyses. As he himself is no expert on this field he has forwarded your article to ^{the} most brilliant disarmament expert of our parliamentary group, Mr. Alfons Pawelczyk. We are sure that your article will be of the greatest interest for him and Willy Brandt has suggested to him to get in contact with you if there should be any chance for him to fit an appointment with you in his schedule when he should come to the United States.

Yours sincerely,

(Dr. Thomas Mirow)

Dear Mr. Meselson,

Mr. Brandt has asked me to thank you for your
letter of August 29, 1985 and for sending him the
article describing your studies of "Yellow Rain".

Sincerely yours

Thomas Korff
