Paul Doty telephoned from the USA on 15/5 May to say that Fulbright's Committee has ~~be~~ had hearings on B & CW. Investigation of this subject was motivated by concern that if Land's view on the slippage of American deterrent power is true, then perhaps the US should see what could be done with B & CW weapons.

CK

Doty's colleague Maselson (whom you will remember from correspondence with Sir Henry Hardman a few years ago) has contributed greatly to the debate - so much so that he has turned the tide in the exactly opposite direction and the Senate may now take positive action for the first time in years on the Geneva protocol.

Maselson will be in Geneva on 24th May and will pass through London on 26th or 27th May. He will telephone you at home in Norfolk.

God

Doty himself may pass through London en route to Paris on 28th May. He'd much hoped to see you when you are in New York, but he himself will be out of the USA for some days during your first week there.

I THINK THIS IS A
CABINET OFFICE
ORIGIN DOCUMENT

— '... Doty telephoned
from the USA on...

SINCE IT IS MANUSCRIPT,
IT COULD WELL BE
FROM HIS PRIVATE
SECRETARY IN THE
CABINET OFFICE.

John
