Professor Matthew Meselson
Harvard University
Cambridge, Mass.

Dear Professor Meselson:

On November 11, as part of the stepped-up November campaign to halt the war, the Berkeley community is holding an all-day and evening teach-in on Chemical and Biological War. The meetings are sponsored by the East Bay Women for Peace, Scientists and Engineers for Social-Political Action, and Science Students for Social Responsibility.

Will you help us by sending a message to be read at the Noon Rally on the U. C. campus, and at the Little Theatre in the evening? Anything you can say to encourage people to rid our nation of these infamous weapons and of a policy that would countenance their use, will be of great value.

Sincerely,

Frances W. Herring
East Bay Women for Peace Coordinator, November 11 CBW Events
