

January 5, 1970

Mr. Robert M. Smith  
The New York Times  
1920 "L" Street  
Washington, D.C.

Dear Bob,

Here are two background items on the use of gas in the Yemeni civil war. The longer item is from a draft of the SIPRI CBW study. The study itself has not yet been published. The other item is Chapter 8 from the book "Chemical and Biological Warfare" edited by Stephen Rose and published in the United States by Beacon Press in 1968.

Sincerely yours,

Matthew Meselson
