Gabin

Dear Matt:

Time was too short (perhaps nearly too long in terms of the dash for the airplane?) but, as usual, interesting and enjoyable from my point of view.

Flying out from the windblown shores of California the other morning (December 29), there was an opportunity to glance briefly through the Los Angeles Times (please see enclosed). Are the last few paragraphs part of the "another California boy makes good" series? Seriously, I am interested in knowing of your trials and tribulations regarding the matter in the report.

Thanks for your letter on Captain John Wheeler. Do you have a copy of his study? At any rate, I would like to know how he fares as far as the White House Fellowship is concerned.

By the way, the thought was much appreciated and many thanks to you and Sarah for the card! Gleichfalls and

Cheers,
