

January 22, 1970

Mr. Richard Brooks
190 North Cannon Drive
Beverly Hills, California 90210

Dear Mr. Brooks,

I have written to three persons abroad telling them that you may call upon them for background information on biological warfare. They are

Mr. Derik Viney
BBC
Bush House
London, W.C.2
England
Telephone: COV 3456 Ext.2158

Dr. John H. Humphrey
National Institute for Medical Research
Mill Hill
London, N.W.7
England
Telephone: 435-0646

Mr. Julian Perry-Robinson
SIPRI
Sveavagen 166
113 46 Stockholm
Sweden
Telephone: 32 53 59

Last August I said I would let you know the address of the Council for a Livable World in Washington, an organization made up mainly of scientists attempting to bring about arms control. If you would like

January 22, 1970

2

to send them a contribution the address is:

Council for a Livable World
201 Massachusetts Avenue, N.E.
Washington, D.C. 20002

For your information, I enclose three items describing the Council for a Livable World. It is an unusual and, I think, highly effective organization. Your contribution would be very much appreciated.

Finally, I enclose the proceedings of a conference on chemical and biological warfare held here during the summer and a copy of a paper I have just recently prepared on the problem of toxins.

Sarah and I send you our warm regards and hope this letter finds you and your family happy and well.

Sincerely yours,

Matthew Meselson
