FEB 23

Dear Dr. Meselson:

Thank you for the copy of your bibliography on CS. I am enclosing a copy of a report which you may not have and two clippings which recently arrived. Also, the latter portion of my Medlar search should have been forwarded to you from Countway Library.

Recently I received a copy of the Army report "Biological Assessment of MK IV Chemical Mace." Should this be of interest to you, I will forward a Xerox copy. As you know, the Army recommends the use of CS by police. I am reluctant to see its acceptance and use in place of CN. Particularly in TOP, I believe the skin effects will be brutal. Is there some way that we can discourage the use of CS by police?

Sincerely yours,

*Jack L. Pinkus*
