Cambridge, Massachusetts 02138

Dear Matt:

I'm again grateful for the insight you've given me into an esoteric but vitally important subject---toxins.

It is my hope that your voice will be heeded on this subject as it was on the chemical warfare/poison gases matter.

Needless to say your further comments and insights will always be most welcome.

As you know, this issue was vigorously debated in the Congress last year, and is likely to be considered even more seriously this year in view of the President's own pronouncements in this field. Your paper will be kept on hand for future reference, and will be most helpful, I can assure you.

With kind regards, I am,

Sincerely yours,

Edward W. Brooke
