Dear Dr. Meselson,

Here is a quick and dirty read and comments. The only BIG mistake is the team ended in Oct 1986, not 1985. Sauri was there one year and I was there two years and stayed another 8 months as a member of the Naval Attaches office. As an epidemiologist, I was the one who organized the data for the first time. However, even without that, Mike Sauri easily found the naked emperor.

Steve
