Cambridge, Mass. 02138

Dear Matt:

After a most unreasonable delay our Photography Department has returned the negatives saying that it is impossible for them to make slides from the negatives. They say they can easily make slides from the pictures themselves, however. I don't quite understand why this is, but I found that I never win when I argue with them. Therefore I am returning the negatives which you sent, with ~~the~~^a request to borrow the photographs from the original document if that is possible. An alternative would be to have a set of slides made in Cambridge from the original document and I will pay for them. Please let me know which of these would be most convenient for you.

Your presentation to the FAS Council was, as usual, superb. Please let us all know if you hear anything further about the submission of the Protocol to the Senate.

Sincerely,

Victor W. Sidel, M.D.
