Professor Matthew Meselson
Department of Biology
Harvard University
Cambridge, Mass.

Dear Professor Meselson,

Dr. Kalman suggested that our group, which is researching the use of riot control agents, contact you for any information you could send on the subject.

Among the questions which we have not yet been able to answer, one in which you might be able to help, is the question of which CS variety (CS, CS1 or CS2) is presently being used in the "pepper fog" that has come increasingly into use.

Any help and information which you can give will be greatly appreciated.

Sincerely,

Laurence Chalip
