

United States Senate

WASHINGTON, D.C. 20510

June 3, 1970

Professor Matthew Meselson  
Department of Biology  
10 Divinity Avenue  
Harvard University  
Cambridge, Massachusetts

Dear Professor Meselson:

In chatting with Jeremy Stone it occurred to me that you might be interested in Senator Gravel's recent activities on the most current issue for us in chemical weapons. I hope you will have a chance to scan these enclosures in order to see what our approach is.

Should you be in Washington in the near future and be interested in pursuing any of these matters of mutual concern, we would of course be anxious to meet with you. Our telephone number is (202) 225-6665.

Sincerely,

  
Douglas N. Jones  
Legislative Assistant
