Dear Matt:

Enclosed please find a reply I have just received from my colleague in Paris, Dr. Michele Batisse, regarding the inquiry you made earlier into UNESCO's work on defoliation. I hope the information he supplies is helpful to you. If there is any other aspect of UNESCO's program, about which we might talk together before I return to Paris in September, please do grant me the privilege to meet with you. I wish you all success in your earnest and informed attack on the grave problems of our troubled world; I admire your courage in speaking out the way you do and on undertaking the studies you plan.

Kindest personal regards,

Sincerely yours,

Bob Maybury
